**FOOT MEASUREMENT INSTRUCTIONS**

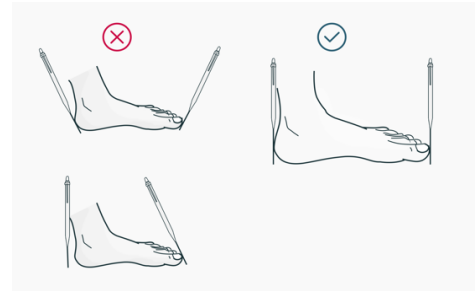

**STEP 1: PREPARE**

1. Measure your feet at the end of the day, when they are at their largest
2. Be barefoot or put on socks that you plan to wear with the new shoes
3. Stand straight on a hard surface

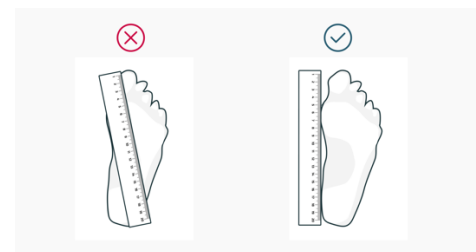

**STEP 2: OUTLINE THE FOOT**

1. Ask a friend to help you
2. Stand straight with your weight equally distributed on both legs
3. With a pen or pencil pointed straight down, trace the outline of your both feet on the paper, because it's normal for one to be longer than the other

**STEP 3: MEASURE FOOT LENGTH**

1. Measure the distance between two most prominent points (from the outermost part of the heel to the end of the longest toe)
2. Write down the numbers you get
3. Make a photo of the outline of your foot and send it to us with the measurements of both feet

**STEP 4: MEASURE FOOT WIDTH**

1. Use a measuring tape and wrap it around the widest part of your foot at your bunion joint.
2. Ensure you have your full weight on the foot
